

PERFORMANCE IN SYNC WITH YOUR DESIGN

Made to harmonize with your space and aesthetic, DIRTT delivers its slimmest line yet. The best of manufactured construction together with the aesthetic of clean lines and a reliable fit. It's a minimalist profile that reflects your vision.

- ① Base height of only 1¾" (44 mm)
- ② Frameless glass barn doors with hidden hardware track
- ③ More than 60% thinner than DIRTT's standard glass walls
- ④ Innovative levelling system (½" variance) works in more places with uneven floors
- ⑤ Slim profile ceiling connections
- ⑥ Transparent polycarbonate glass connections reduce the number of vertical supports
- ⑦ Efficient manufacturing to keep your project on schedule

BUILT WITH THE SPEED AND PRECISION YOU EXPECT FROM DIRTT

Reflect walls are designed and built within the DIRTT ecosystem, backed by 15 years of excellence in manufactured construction. Your vision is integrated in DIRTT's proprietary software, manufactured and pre-cut before arriving on-site. Expect precision manufacturing, completed efficiently. And with a solution driven by technology, there are no surprise price changes.

IN HARMONY WITH THE BASE BUILDING

Walls in the Reflect line are assembled on-site where they're independently levelled to the exact tolerances of your building. The levelling capability ensures each pane of glass can be adjusted within 1/2" (13 mm) of variance. Uneven floors and a slim-line wall solution can be together at last.

BUILT IN BALANCE WITH SUSTAINABILITY STANDARD

As part of the DIRTT ecosystem, Reflect is designed in proprietary software that feeds into precise manufacturing. The process means glass can be sourced locally without the risk of incompatibility, reducing shipping costs and environmental impacts. Further, aluminum used in all DIRTT solutions contains 50-60% recycled content. Your DIRTT team can work with you to evaluate applicable green building credits.
